SUMMARY

I'm a full-stack developer with over a year of experience building web and mobile applications using the MERN stack and TypeScript. I create **responsive interfaces** and **scalable backends**, delivering end-to-end solutions from architecture and APIs to VPS/cloud deployment. Skilled in **Docker, CI/CD, Nginx, PM2, SSL, and server monitoring**, I focus on building **reliable, maintainable, production-ready applications**.

SKILLS

- **Frontend:** React, React Native, TypeScript, Redux, Context API, Expo, TailwindCSS, MUI, Bootstrap, Next.js
- **Backend:** Node.js, Express.js, REST APIs, JWT, Passport.js
- **Databases:** MongoDB, Firebase, MySQL, S3 (object storage)
- **DevOps/Tools:** Docker, Git, CI/CD, Cloud, Cloud (AWS, VPS), Nginx, PM2, SSL/TLS, SSH, Cron jobs, EC2
- **Others:** Postman, Figma, Github, npm, Linux command line

PROFESSIONAL EXPERIENCE

WAL+L

New Friends Colony, Delhi

Software Development Engineer

Jul 2025 – Present

- **Built a full MERN-stack product management application**, handling end-to-end development from frontend (React, Tailwind CSS) to backend (Node.js, Express, MongoDB), ensuring scalable and maintainable code.
- **Developed secure RESTful APIs with JWT-based authentication and role-based access control**, automated processes via dynamic dashboards and real-time modules, improving workflow efficiency by 30% and API performance by 25%.
- **Deployed and managed the application in a production-grade VPS environment**, leveraging Docker for containerization, Nginx as a reverse proxy, and PM2 for process management; configured SSL, firewall rules, auto-restart policies, and cron-based automated backups to ensure high availability and system reliability.

Hobit Technologies

Faridabad, Haryana

Software Development Engineer

Jan 2025 – Jun 2025

- Contributed to **3 cross-platform products** (Hobfit wellness app, Daisy CRM website, and SalesPulse app) using **React Native, React, TypeScript, Firebase, and Capacitor**.
- Built **40+ modular UI components**, booking flows, dashboards, and APIs, leading to a **20% faster user onboarding** and streamlined CRM operations.
- Integrated **real-time activity tracking, push notifications, and Razorpay payments**, and designed **role-based dashboards**, boosting staff productivity by **25%** and ensuring scalable performance across platforms.

PROJECTS

WTech Full-Stack Application

August, 2025

A MERN-stack enterprise application for project and product management for 75+ users, featuring real-time dashboards and automated modules.

- **Designed and developed the full MERN-stack architecture** (React, Tailwind, Node.js, Express, MongoDB), containerized with Docker.
- **Automated workflows and built dynamic, real-time dashboards**, improving operational efficiency by 30% and optimizing backend logic for 25% faster API responses, enabling a unified platform for all users.
- **Deployed and managed the application in a production-grade VPS/cloud environment**, leveraging Docker, Nginx, PM2, and cloud infrastructure; configured SSL, firewall rules, auto-restart policies, and automated backups, with integrated CI/CD pipelines to ensure secure, scalable, and high-availability releases.

StayNest website

April, 2025

A full-featured property rental platform with user authentication, listing management, and a responsive interface.

- Developed **frontend (Bootstrap, HTML, CSS, JS)** and **backend (Node.js, Express.js, MongoDB)** for seamless property browsing and booking.
- Implemented **secure authentication** using Passport.js and **RESTful APIs** for scalable communication between frontend and backend.
- Implemented **role-based access control and input validation to enhance security and data integrity**.

EDUCATION

J.C Bose University of Science & Technology, YMCA, Faridabad

2021 - 2025

B.Tech. - Electronics Engineering with specialization in Internet of Things

CGPA: 7.10 / 10
